

Japandi Room Setup Checklist

A practical 4-page guide for calm, warm, functional interiors.

Use this before you buy anything

- ☐ Measure the room and the furniture path.
- ☐ Choose one warm wood family and repeat it.
- ☐ Keep the palette quiet: warm white, beige, taupe, charcoal.
- ☐ Prioritize closed storage before decorative objects.
- ☐ Layer light instead of relying on one bright fixture.

Designed by Quiet Field Living

Start simple. Add only what the room needs.

1. Build the Calm Base

Finish these before styling. The room should feel settled even with nothing decorative added.

COLOR

- ☐ Warm white or soft off-white walls
- ☐ One dominant wood tone: oak, ash, walnut, or similar
- ☐ One darker anchor: charcoal, black, or deep brown
- ☐ No more than 3-4 main colors in the room

MATERIALS

- ☐ Natural wood is repeated in at least two pieces
- ☐ Textiles are tactile but quiet: linen, wool, cotton, boucle
- ☐ Glossy finishes are limited
- ☐ Patterns are subtle and used sparingly

LAYOUT

- ☐ Main walkway is clear
- ☐ Furniture has breathing room around it
- ☐ Large furniture is not blocking windows or doors
- ☐ Negative space is intentionally left empty

2. Furniture & Lighting

Choose pieces that solve a job first, then judge whether the shape and finish support the room.

FURNITURE

- ☐ Low-profile silhouettes where practical
- ☐ Rounded or softened edges for visual calm
- ☐ Closed storage for everyday clutter
- ☐ Furniture scale matches the room, not the product photo
- ☐ At least one piece has visible natural grain or texture

LIGHTING

- ☐ Bulbs are warm white, around 2700K
- ☐ Use 2-3 light sources instead of one harsh ceiling light
- ☐ Shades diffuse the bulb rather than exposing glare
- ☐ A floor or table lamp creates a softer evening mode

BEFORE YOU BUY

- ☐ Width, depth, and height are written down
- ☐ Door, hallway, stair, and elevator clearance checked
- ☐ Seat or table height matches existing furniture
- ☐ Return policy and current availability checked

3. Final Edit

Japandi usually improves when you remove one more thing.

FINAL CHECK

- ☐ Every visible object has a purpose or a strong reason to stay
- ☐ Surfaces are not crowded
- ☐ Cables and chargers are hidden or grouped
- ☐ Decor repeats the room's palette instead of adding new colors
- ☐ Plants or branches are used sparingly
- ☐ The room still feels good in evening light

The 3-part room formula

- 1. Anchor** One main piece: bed, sofa, table, cabinet.
- 2. Warmth** Wood + one soft textile + warm light.
- 3. Restraint** Leave visible space. Stop before the room feels full.

Keep this checklist next to your measurements while shopping.
